a Carrier now – a Carrier that wants my load.*

Real Time Freight

PRODUCT OVERVIEW

The Real Time Freight LaneSourceSM tool is designed to help you find capacity NOW. Find qualified transportation partners instantly, source a new lane or increase capacity on an existing lane in just clicks. LaneSourceSM is a fully scalable cloud based application. That means no large IT setup fees and no installed software. The RTF Customer Support group can get you turned on and setup immediately.

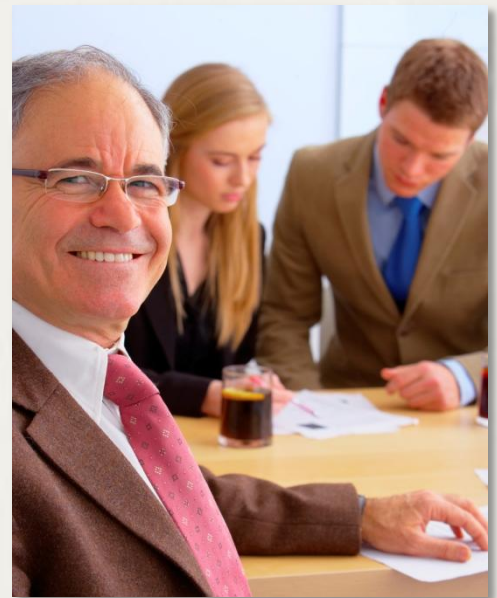

Our sophisticated matching technology will immediately display a list of Carrier Companies that want your freight. This is how it works: the trademarked LaneSourceSM matching technology will process your lane criteria against hundreds of data points in our extensive data store. Our growing Carrier community and partner data store is updated in real-time.

Immediate access to Carriers that want your freight

Data points include matching your lane criteria with Carriers that have a history of submitting bids, winning freight, winning RFP lanes, and have posted equipment or searched for freight matching your lane. New Carriers are added daily. The RTF Transportation group and RTF Partners are dedicated to on-boarding new carriers.

CUSTOMER BENEFITS

Whether you source a new lane or increase capacity on an existing lane, our matching technology will only display results for a Carrier Company that wants your freight. The matching list of Carriers have expressed interest in your freight and have demonstrated success. The list of matching Carrier Companies can include rate history, insurance, references, performance and ratings, when available. We compare the matching Carrier rates to one another and to the market, to help you make an informed decision. The RTF Lane Source is fully integrated into the RTF Freight Management System, to help find qualified carriers and distribute your freight in just clicks.

ABOUT US

As a proven leader in freight transportation technology, Real Time Freight, LLC drives more success than any other solution on the market today. The trademarked Real Time FreightTM solution delivers more features and functionality, streamlines communication like never before, and offers the easiest and best user experience for each party involved in the freight transportation transaction.

EASY TO USE

RTF LaneSourceSM is a fully web based solution with no installed software required (SaaS). Your account is setup and your staff is trained in as little as 2 hours. On-line video training is available 24/7. Personal training by our Customer Support group is included. Telephone support is available during business hours (M-F, Central 9am-5pm). Our customer support group will ensure your success.

RTF LANESOURCE RESULTS

RTF LaneSourceSM provides market rates and performance data to help you benchmark your results and compare listed Carriers for the lane. The results will display a comparison of offer and paid rates for each Carrier with each Carrier, and with the market .
