**PRODUCT OVERVIEW**

The Real Time Freight RateAnalysis™ solution allows you to assess and determine the best rate on any given lane. You can view (in real time) historical and current market rates to benchmark rates and make better decisions. All rates are automatically processed on a lane-by-lane basis where rate information is applied to the decision process, and saved with the lane. Establish target rates, compare your contracted rates to the market, and monitor your rates to ensure they stay within tolerance. This advanced solution gives you an advantage to ensure that you are paying the lowest rate on every load.

**BENCHMARK**

The Real Time Freight RateAnalysis™ solution allows you to benchmark your rates with the market in real-time so you can assess and determine the best rate on any given lane. It is designed to provide you with current rate data to help you make better decisions and capitalize on market changes. Create a complete benchmark report comparing your rates to the market and your history, in just clicks.

**MARKET RATES**

The best rate can change depending on your perspective. To determine a rate for a given lane, many customers will start by looking at their history. This is a good start, but comparing your rates to the market in real-time gives you a greater advantage. Capacity is a commodity that changes in value depending on the market. The RTF RateAnalysis™ is a sophisticated tool that allows you to process rate information, and apply this information to minimize your freight spend automatically. The RateAnalysis™ solution has been developed as a cloud-based open source application that allows you to plug in rate data to understand and capitalize on market changes. The RTF RateAnalysis™ solution supports most industry rate engines.

**ABOUT US**

As a proven leader in freight transportation technology, Real Time Freight, LLC drives more success than any other solution on the market today. The trademarked Real Time Freight™ solution delivers more features and functionality, streamlines communication like never before, and offers the easiest and best user experience for each party involved in the freight transportation transaction.

**EASY TO USE**

RateAnalysis™ is a fully **web-based** solution with no installed software required (SaaS). Your account is **set up** and your staff is trained in as little as 2 hours. On-line video training is available 24/7. Personal training by our Customer Support group is included. Telephone support is available during business hours (M-F, Central 9am-5pm). Our customer support group will ensure your success.

**RESULTS**

RTF RateAnalysis™ is a scalable, versatile solution that allows you to run single or multiple lanes quickly and easily.

**SINGLE LOAD** | **MULTIPLE LOADS** | **FREIGHT HISTORY**
