**SmartSelect**<sup>SM</sup>  
Complete Auto-Tendering system

*"No longer do I spend hours calling my limited list of freight companies, wondering if the price is fair, wondering if they will call me back. I simply post freight on our load board, and RTF does the rest."*

*Suzy Smithson at Flavor Rite Foods*

## PRODUCT OVERVIEW

The SmartSelect<sup>SM</sup> component of the Real Time Freight Network allows you to control and manage your freight, while taking a step back from the process. Once a load is posted, it can be Auto-Tendered to the winning carrier based on a set of shipper-determined rules. You create rules to fit the criteria of the load and the SmartSelect<sup>SM</sup> feature will match up the most suited carrier or broker responding. Rules can be established based on rate, response time, carrier rating, and familiarity of the carrier.

## CUSTOMER BENEFITS

### Hands Off Process

Make smart transportation decisions while allowing the system to adjust and execute these decisions for you. All available loads can be automatically booked through the Real Time Freight System; specific carriers and/or distribution groups can be selected for specific loads.

### Time Savings

With the system matching loads and tendering the load to the appropriate carrier, the you gain valuable time back throughout your day.

### Controlled Exposure

Loads are posted only to designated carriers or distribution groups. You can distribute your freight information to a single carrier, specific carrier groups, or to anyone matching the individual rules per load. You regulate the acceptable responses per load, thus gaining control over all aspects of tendering freight. You also gain more control over the selection of transportation vendors you work with.
