TP Message Center** SM

 MODULE

The RTF Transportation Partner Message Center is designed to help your company stay in touch and communicate in real-time with your partners.

Real Time Freight is proud to introduce the Transportation Partner Message Center (TPMC). The TPMC allows you to communicate better and more efficiently with your transportation partners and fleet.

*One click communications
with your fleet, core or loads-on-the-road.*

The challenges facing Real Time Freight customers are ensuring that their transportation partners are qualified, managed, and their rates are competitive. With Real Time Freight, our customers overcome these challenges and realize a centralized, secure, and controlled freight management solution. **A strong core is built on your ability to communicate.** The TPMC runs on this framework, and allows you to instantly communicate with your core. Alert messages will instantly appear to your core with optional emails sent to their inbox. Whether it is a new load or lane, changes to assessorials and contracts or updates in routing; stay in touch with your core and keep everything in one place. Manage all partner communications, documents and attachments. Fully integrated and set up through your current distribution lists.

award winning technology at work for you
