Track & TraceSM**
Load tracking and lifecycle management

*Track & Trace provides our customers with fast, reliable and secure 2-way communications and the ability to upload and share documents.
- Real Time Freight*

PRODUCT OVERVIEW

Monitor the lifecycle of each load after it is tendered with RTF Track & TraceSM - for complete load tracking and lifecycle management. Set up custom load status schedules, share Track & Trace functions with awarded transportation companies, and allow all parties involved to upload documents. Real-time communication through RTF's secure closed-loop freight management system.

Award winning technology at work for you.

The RTF Track & TraceSM application lets you set up custom tracking schedules to monitor the lifecycle of each load. Set up your Track & Trace schedule to optionally share milestones with your transportation partners or fleet. Easy to use graphical interface provides rich functionality that includes the ability to upload and share documents.

View Proof of Delivery, signed BOL, weight tickets, toll receipts, etc.. Track & Trace also accepts and transmits EDI transactions easily mapped via data conduit to your company's system of record. Also set up conditional oversight for approval. It's fast, reliable and secure - providing intelligent lifecycle management on every load.

Real-time communication through RTF's closed-loop freight management system.

Real Time Freight strongly believes in talking to their customers and understanding their successes, failures and struggles. A strong community is built on its ability to communicate. The Real Time Freight Customer Service team is set up to support relationships, not just users.

We are here to help.
